Dear Clients,

As we slowly leave the winter behind us, we anticipate the warmer days ahead and welcome the allure that comes with it. Recent years have reminded us of nature's beauty, the wonder of the different seasons and the importance of freedom.

We clearly see all these influences in this spring/summer collection. The collection features natural colors and fabrics, but also striking color combinations and fresh prints.

Our themes *Dream Oceana*, *Connecting with Nature*, *Bringing Textures*, *Being a Flower*, *Modern Tropical* and *Bohemian Romantic* fit in seamlessly with these elements. Imagine natural tones, warm pastels, bergamot brights, and the blue colors from the sea.

We hope you get inspired by this magazine and we would be delighted to show our complete collection in our showroom or through our agents.

Knipidee Team

dream

OCEANA

The ocean is a powerful symbol. This serene place represents mystery, endlessness, calmness, strength, and even truth. The blended fibers and luxurious structures in the fabrics create a rich feeling. Dreamy designs in watercolors give this theme a real *Dream Oceana* vibe.

connecting
with **NATURE**

Escape the daily grind and feel good by *Connecting with Nature*. Embrace small ways to be in contact with nature, like noticing the spring flowers, to release positive and calm feelings. Beautiful leaf designs on fine summer qualities, such as cotton, give you a truly natural feeling.

being

a FLOWER

Elegance, sophistication, femininity intertwine in floral designs. The beauty of flowers brightens up every season as they symbolize spring. *Being a flower* means appreciating the beauty around us while we can, cherishing our loved ones, and living every day to the fullest.

bohemian

Rich flower designs and a variety of multi-colored motifs, ranging from paisley to ethnic, characterize the *Romantic Bohemian* style. Its natural essence is enhanced by the use of cotton, viscose, and linen. The typical bohemian style includes a color palette of earth tones combined with vibrant colors.
